

To Download Pictures

1. Find the cord that goes with your camera.
2. Plug the cord into the camera then into the computer
3. Turn the camera on. After about a minute a box will pop up. Choose Copy Pictures to a Folder On My Computer.
4. Choose next.
5. Make sure all of the pictures are selected and press next.
6. The name for the group of pictures should say picture (no capitals and make sure spelling is correct).
7. On Choose a Place to Save This Group of Pictures, click on browse. Another box will come up. Click on Desktop. You will see a few folders. Click on your folder.
8. Make sure that Delete Pictures From My Device is chosen and press next.
9. Press Next and then Finish.

To Make an .AVI File From Pictures

1. Open Monkey Jam.
2. Choose File and then Import then Images
3. Click on Desktop then your folder's name
4. You should now see the names of all of your pictures in the bottom box. Hold the Shift button down and click on the first file and the last file. This should highlight all of your picture files. Click on the Add Files button and then Import.
5. Now click on File and then Export .Avi
6. Click the down arrow by the save in box and choose Desktop.
7. Double-click on your folder.
8. Erase everything in the filename box and type movie.avi
9. Choose 640x480 on the movie size. Click on Save Movie.
10. It will take a few minutes to render the images.
11. To view, exit out of Monkey Jam and open Movie Maker
12. Choose Import Video. Click on Desktop on the side of the box that comes up on the screen and double-click your folder. Find the file named movie and double-click it to import it. Click on the play button on the screen on the left to watch the clip. When finished exit Movie Maker, but save nothing at this time.

*Anytime you add or delete pictures from your folder, a new .avi file will need to be made in Monkey Jam.
