Awareness Books for Children

1023 Waterwood Parkway, Edmond, OK 73034
Edmond, OK

awarenessbooksforchildren.org

BOOKS**1. How to Solve a Problem Like Bullying by Neeti Kohli, M.D.**

This book is designed to educate young children on how to handle a bully. It boosts a child's confidence, teaches a child to assess the situation, and act accordingly. It also teaches empathy to a child who is a bystander and lets a child know what he or she can do to help someone who is being bullied.

It is also important to prevent more bullies from being formed. This book teaches a child to understand the difference between what is right and wrong, and set them on a path to make correct choices in life.

This is a unique book with the potential to increase awareness, and to make a difference.

2. Kids on Screen by Neeti Kohli, M.D.

This is a charming, brightly-colored book designed to educate young children about the positive and negative effects of electronic devices with screens. This book provides easy to follow advice based on the recommendations of the American Academy of Pediatrics and serves as a great conversation starter between parents/teachers and children. Additionally, because peers can have a great, positive impact on each other, Kids on Screen is written as if one child is speaking with another child.

3. Understanding the Basics of Cyberbullying (Coming Soon)**POSTERS**

1. Equality
2. Bullying
3. Cyberbullying
4. Internet Safety

Data Frontline Inc

6046 FM 2920 #114

Spring, TX 77379

www.datafrontline.com

Data Frontline, an innovator in cloud technology, is launching their latest product – EDU at OTA 2014. The EDU product is the first of its kind to offer school administration capability – completely in the cloud – untethered by outdated hardware, security and facilities. EDU matches and exceeds functionality that previously was only available at packages at much higher costs. EDU is a safe and secure alternative to outdated software that requires a huge commitment in capital expenditures and costly consulting services. EDU is also an excellent choice if you need to setup a school framework outside of your current environment. Please stop by our booth and see the future of technology.

Odyssey of the Mind, a student-led creative problem-solving program involves students from kindergarten through college. Up to seven team members work for months to solve a predefined problem, under guidance of a coach but without assistance, and present their solution at a competition each spring. The team must also generate answers to a problem they have not seen before during a spontaneous phase of that competition. Problems can involve vehicles, structures, robotics, theatre arts, music, and more. OotM aligns with STEM.

Oklahoma Education Association

323 E. Madison
Oklahoma City, OK 73105

www.okea.org

The Oklahoma Education Association has long been considered the voice of education in Oklahoma. Founded Oct. 19, 1889, as the Oklahoma Teachers Association, the group held its first meeting on Christmas Day of that year at the Guthrie First Methodist Church.

The OEA has a rich heritage of fighting and winning battles for public education. The Association's work with local and state governmental agencies and the Legislature and the governor is well-documented. And, the OEA helped change the nation's teaching profession through the courts, as well. The firing of Muskogee's Kate Frank in 1943 for working to unseat several school board members spawned her famous battle that launched a National Education Association defense campaign. Today, NEA's Kate Frank/DuShane Fund provides money to fight member rights cases across the country.

As we enter the 21st century, the OEA has nearly 40,000 members, comprised of public school teachers, coaches, counselors, librarians, and administrators; nurses, custodians, cafeteria workers, bus drivers, secretaries and other support personnel; retired teachers; and education majors at Oklahoma colleges and universities.

www.video-reality.com

Video Reality has been in the audio/video business for over 20 years. During the last 15 years we have been creating custom integration solutions for schools, government agencies, and businesses throughout Oklahoma and Arkansas.

As a leading reseller for SMART Technologies, we are consistently ranking as one of their Top 10 dealers nationwide. As an authorized SMART Reseller with a full service training and showroom in Oklahoma City, Oklahoma, we can offer full local support!

We have integrated SMART Boards, projector systems, digital signage, video conferencing, and control systems into universities, vocational schools, and distance learning labs across the state of Oklahoma and Arkansas. We are committed to providing great technology integration through top of the line products, professional installations, and quality customer service. We provide local service and support that our customers can rely on.

Waterford Institute

1590 East 9400 South
Sandy, UT 84093

<http://www.waterford.org/>

Used successfully by millions of students, Waterford Early Learning™ is a comprehensive, computer-based curriculum designed to help PreK-2 children build the academic foundation necessary for a lifetime of learning. Waterford Early Learning individualizes several years of comprehensive language arts, math, and science education.

Composed of Waterford Early Reading Program™ and Waterford Early Math and Science Program™, Waterford Early Learning does not assume students have background knowledge or pre-literacy skills. Starting with the basics, the program adapts automatically to give each student a learning experience that's focused on his or her exact needs. On-demand reporting gives teachers more insight into the learning process through in-depth analysis of a single student or a snapshot of the entire class.

Woody Guthrie Center

102 East Brady St.
Tulsa, OK 74103

The Woody Guthrie Center is more than a museum; instead, it is a center of investigation for inspiration. By providing examples of Woody's ability to use his creativity as a way of expressing the world around him, we hope to encourage others to find their voices and the power that lies within the creative process.
